

### Worksheet: Correlation

1. Two lists of data  $x_1, \dots, x_n$  and  $y_1, \dots, y_n$  have the following properties.

$$\begin{array}{ll} \text{mean}_x = 10 & \text{sd}_x = 2 \\ \text{mean}_y = 3 & \text{sd}_y = 4 \quad r = 0.5 \end{array}$$

- a) Find the equation for the regression line and make a sketch.

- b) Predict the  $y$  value if  $x = 8$ . If  $x = 14$ ?

### Worksheet: Correlation

1. Two lists of data  $x_1, \dots, x_n$  and  $y_1, \dots, y_n$  have the following properties.

$$\begin{array}{ll} \text{mean}_x = 10 & \text{sd}_x = 2 \\ \text{mean}_y = 3 & \text{sd}_y = 4 \quad r = 0.5 \end{array}$$

- a) Find the equation for the regression line and make a sketch.

- b) Predict the  $y$  value if  $x = 8$ . If  $x = 14$ ?

2. For the given data, calculate  $\text{mean}_x$ ,  $\text{sd}_x$ ,  $\text{mean}_y$ ,  $\text{sd}_y$  and  $r$  then find the equation for the regression line.

$x$	$y$
1	3
2	1
6	-1
